

Improve your PUE

Stop unwanted air Recirculation
in your Data Center

*The lowest cost blanking
panel on the market !*

EZIBLANK® keeps hot exhaust air away from cool intake air, extending the life of your equipment, saving energy and reducing the carbon footprint of the data centre.

These uniquely adjustable panels can be fitted to every size of rack unit, from one to six.

The innovative 'pop-in clip' allows the panels to be installed or removed in seconds without the need for screws or tools.

EASY TO USE

Simply snap off the number of panels needed

SIMPLE TO INSTALL

No screws or tools needed.

SAVES MONEY

Saving energy, cuts costs and is good for the environment

FITS ANY RACK SIZE

Size each panel to suit your Equipment

ENVIRONMENTALLY FRIENDLY

Only recyclable plastic is used – it's great to be green !
Antistatic and flame retardant to UL94 V-0

EZI - Installation instructions!

Eziblank Installation, 6 x 1 RU Panel.

To install a single RU Panel, firmly bend where required.

Then fold backwards and "snap" off as required.

Place the panel in position, aligning the clips with the 19" mounting holes and push into place.

There's an EZI selection of individual panel combinations.

If required, all six panels can be placed into rack as a single component.
