

STARLINE[®]

Flexible Power for Retail Success

STARLINE Plug-In Raceway: Next generation raceway for today's power needs.

STARLINE® Plug-In Raceway was created to meet the ever-changing power distribution needs of the fast-paced retail environment. Though it may look like other raceway products, STARLINE Plug-In Raceway has the unique ability to add or relocate plug-in modules anywhere on the raceway quickly and easily. When changing displays you can eliminate the added cost of an electrician to reconfigure circuits, receptacles and wiring. You simply snap the pre-assembled plug-in modules into place on the raceway backplane and the connection to power is made automatically without having to interrupt power. Plus, an optional Datacom channel is available for data, video and audio applications.

STARLINE Track Busway: Overhead power and lighting flexibility that's in your reach.

We've built a better way to provide electric service to any retail environment and at any point in the store's life. With STARLINE Track Busway, easy installation means reduced store construction time and costs. And our modular, overhead electrical distribution system is flexible and scalable so you can relocate power anywhere you need it.

As the industry standard for flexible power in the retail environment, we have become the power distribution supplier of choice for some of the biggest retail names in North America. And with both power and lighting capabilities, STARLINE Track Busway is the ideal and comprehensive electrical distribution choice that can save time and money, today and tomorrow.

Reduced Store Construction Costs

- Labor savings mean installation is less expensive.
- Eliminates costly change orders and outside labor costs for electrical specialists that can occur prior to store opening.
- Lower cost of ownership

Faster Installation

- Building projects are up and running faster.
- Add, remove or relocate power easily and quickly anywhere in the store with no downtime.

Flexibility for the Future

- Faster and less costly remodeling.
- Plug in units can be disconnected and connected without de-energizing the busway.
- Requires no routine maintenance.

Environmentally Friendly

- Less installation materials.
- Busway and outlets are reusable and re-locatable.

More Choices for More Stores

- Scalable, reusable and customizable lengths, sizes and configurations to meet your unique specifications.
- Aesthetically appealing, available in standard and custom colors.
- Can work with any manufacturer's fixtures.
- Ability to quickly add or relocate seasonal displays.
