:: Power Management Solutions In, At & To the Rack

ZONIT is a dynamic product development company that's revolutionizing data center operations through state-of-the-art solutions **in, at & to the rack.**

Zonit boasts an extensive IP portfolio of disruptive products and designs to meet the power management challenges of today's data centers and network closets. Our solutions displace the status quo, maximizing system uptime, security, and flexibility – providing you with more control, less risk, and greater efficiency; solving the primary challenges of mission critical environments.

Headquartered in Boulder, Colorado, Zonit is at the center of innovation, with a global client base, and distribution partners throughout the world. Known for creative products with industry leading quality; Zonit's vision is to become the defacto brand and preferred supplier of data center infrastructure solutions at the rack & beyond.

"Zonit is one of those rare entities...
An innovative company that develops creative solutions with very unique value; while maintaining best-in-class quality standards and performance. This company knows what it takes to support today's growing data center business environment: Zonit products give us peace of mind so we can focus on our business."

— CTO, E-commerce Giant, Fortune 100

:: Creative power management solutions – best in class quality.

Z-LOCK

With Z-LOCK, you'll never have to worry about the security of your connections again. Our universally compatible, dual-locking power cords ensure that every cord stays connected without compromise. Z-LOCK's patented technology securely locks your connections into place on both ends regardless of the brand of PDU or manufacturer of IT hardware, eliminating accidental, vibration and nuisance disconnects or other unintentional disruptions. Z-LOCK is 100% compatible with your existing infrastructure so you don't have to make any changes or upgrades to your existing hardware. This unique cord installs with ease, with locking technology that requires no clips or ancillary hardware. It's as simple as replacing your existing power cord with Z-LOCK.

Z-LOCK secures the power path for all devices in your rack.

Z-ATS MICRO

Z-ATS MICRO offers unique utility in an efficient design. Our MICRO Automatic Transfer Switch ensures that your data center equipment stays operational through maintenance cycles or power disruptions. Developed to provide power redundancy for single-corded devices, Z-ATS MICRO's unique form factor allows for expanded utility as an effective power redundancy tool in any use case that requires auto-switching from the primary power source (A) to the secondary (B) and back. Even better, Z-ATS MICRO is the smallest device of its kind. Its zero "U" form factor facilitates deployment without taking up coveted and costly rack space.

Z-ATS MICRO provides redundancy with maximum flexibility at the rack.

Z-PDS

Z-PDS puts you in control at the rack. Our Power Distribution System is the most reliable and flexible power delivery and distribution device for your data center. Z-PDS brings complete three-phase, A-B power redundancy into your rack, ensures optimal load balancing and allows for fast, easy power reconfigurations by your in-house technicians. The system eliminates the need to de-energize power panels or busways when making power configuration changes and increases reliability and uptime by reducing the domain of failure.

Z-PDS puts the power to the rack back into your hands.
