ZONIT

Z-LOCK

Dual-Locking Power Cord

Securing the power path for all devices in your rack

With Z-LOCK, you'll never have to worry about the security of your connections again.
Our universally compatible, dual-locking power cords ensure that every cord stays connected without compromise. Z-LOCK's patented technology securely locks your connections into place on both ends regardless of the brand of PDU or manufacturer of IT hardware; eliminating accidental, vibration and nuisance disconnects or other unintentional disruptions.

Z-LOCK is 100% compatible with your existing infrastructure so you don't have to make changes or upgrades to any hardware. This unique cord installs with ease, with locking technology that requires no clips or ancillary hardware. Z-LOCK gives you the complete freedom to choose any model of PDU going forward and be assured of locking connectivity.

It's as simple as replacing your existing power cord with Z-LOCK.

DRIVING CUSTOMER SOLUTIONS

"Z-LOCK is exactly what we were looking for: a locking power cord that provides secure connection on both ends, no matter what PDU or gear in the rack or closet. This solution is better than anything else on the market — that's why we standardized on Z-LOCK for all of our facilities. Great technology; works with any PDU, and locks on both ends. Makes it easy to be sure we're always connected!"

— Director of Facilities, Leading Cloud Provider
(400,000 cords & counting)

ZONIT
Solutions In, At & To the Rack

Zonit is revolutionizing data center operations through state-of-the-art power management & control solutions in, at & to the rack. Simple solutions with patented technology to maximize system uptime, security, and flexibility – providing you with more control, less risk, and greater efficiency.

Our suite of products is focused on the rack, designed to meet the power management challenges of today's data centers and network closets.
